---

Gary

Report with table of contents and review comments from Paul. Added potential settling of the cap at the defect area. Talked with the pavement engineer on the ground penetrating radar; he confirmed that it probably will not work on the rock layers. Still checking for another way of looking at uniform placement of an armor layer. We are not meeting this morning?

Thanks

carlos

Subject: [EXTERNAL] Monday Call on San Jac NW Area Cap Delineation in December

David,

Here is Carlos Ruiz's contact information:

Carlos.E.Ruiz@usace.army.mil <<mailto:Carlos.E.Ruiz@usace.army.mil>>

601-634-3784

My times for a Monday call about details on the December delineation probing in the NW part of cap are either: 8 -9:30; or 10:30 - 1; or after 3 pm.

Carlos R - do any of these times work for you?

Thanks,

Gary Miller
